

## Appreciation for My Edited Book, *Faster Than Light* by David Froning

By Thomas Valone, PhD, PE

Back in 2019, I collected the best articles by a famed aerospace engineer, H. David Froning Jr. who I knew personally and hosted his presentations at several of our **Conferences on Future Energy** (COFE 1-12). The articles went into the Appendix of his autobiographical manuscript, which was an editorial

task that took almost a year to assemble into book form with illustrations and the Appendix collection. In 2020, it became the 444-page book called *Faster Than Light: Warp Drive and Quantum Vacuum Power* in paperback, now the “#1 Best Seller in Aerospace Propulsion Technology” on Amazon.

While it has had modest sales for six years, the Podcaster, Ashton Forbes decided on **May 11, 2026** to post a video explanation of the book in the last 5 minutes of his

video, <https://youtu.be/7HIMZkcpPi4?t=558> , with

almost 6000 views so far. It has boosted the sales of the *Faster Than Light* book quite a bit (see description below).

Congressman Burchett received a home briefing from government astrophysicists who explained UFO propulsion on his level. Something vibrates over here and instantly appears over there. The host hears this and immediately recognizes it as Hal Puthoff's polarized vacuum model. But then something even better happens. The host holds up a publicly available book called *Faster Than Light* by David Froning. Inside it is Hal Puthoff's *Defense Intelligence Reference Document* in the appendix. Frank Mead's laser craft at White Sands is in there too. The entire theoretical foundation for the MH370 orbs is sitting in a book anyone can buy. The files were never hidden. The physics was never classified. It has been published and sitting on shelves for years waiting for someone to actually read it. The host has read it. <https://youtu.be/7HIMZkcpPi4?t=559>

Then a few days later on **May 14, 2026**, Ashton again decided to mention it in another subsequent video posting to his 97K followers with even more detail, page and name quotes <https://www.youtube.com/watch?v=tYO0TzvS2sA>

The host is holding a publicly available book called *Faster Than Light* by David Froning and the names inside are not subtle. Frank Mead, George Miley, Robert Bussard, Paul Czysz, all connected through fusion propulsion research conducted for the Air Force and Department of Energy. The same names appearing in two years of live streams confirmed in one published source anyone can buy. Dr. Frank Mead was specifically working on proton boron 11 neutron free fusion propulsion, the exact mechanism behind the MH370 orbs. And here is the part that lands hardest. Five-dimensional physics does not just enable wormholes. It lets you manipulate spacetime at the atomic level. You can engineer reality itself. The web of black project engineers who built this technology is no longer speculation. It is in the book. It has always been in the book.

You can help our nonprofit Integrity Research Institute by purchasing the book from us at: [https://integrity-research-institute.myshopify.com/products/faster-than-light-report?\\_pos=4&\\_sid=4ccc2f6a0&\\_ss=r](https://integrity-research-institute.myshopify.com/products/faster-than-light-report?_pos=4&_sid=4ccc2f6a0&_ss=r).

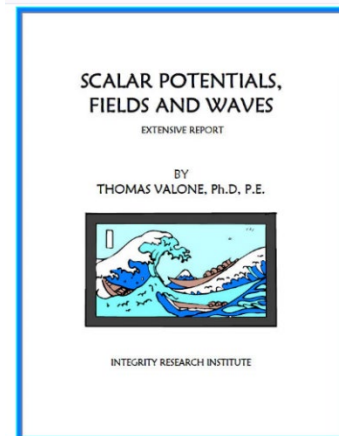

## The KEY - IRI 64 GB Deluxe Library Archive, Version 2 (Vol.2)

Furthermore, if you get really excited about the content, to which David devoted his entire career, we also have completed a herculean task of putting the entire content of twelve **Conferences on Future Energy (COFE 1-12) on ONE flashdrive - The KEY with 64 GB** of space filled to the brim with all of the papers, slideshows, AND video presentations in MP4 for the sale price of only \$49. This includes several of David Froning's presentations and papers as well which help to explain the above-mentioned book very nicely.

And as I mentioned to Ashton as well, IRI also markets the often updated "[Faster Than Light Report](#)" that is almost **80 pages at this time**, filled with the latest scientific articles on FTL signals as well as superluminal space travel.

If that is interesting to those enthusiastic about Mars colonization, our institute is concerned with the several minute delay in communications from Earth to Mars in the future. Therefore, humans will also need FTL signal transmission or what is called "scalar wave" communication. Fortunately, IRI also distributes a "[Scalar Potentials, Fields,](#)

[and Waves” report](#) that has grown to over 75 pages, with practical information and experimental setups for scalar communication that circumvents the EM limit of light speed.

I hope this information is helpful to you since we strive to help humanity and save the world. Therefore, new energy, climate solutions, and electrotherapeutic bioenergetics will comprise future postings in this newsletter.

Best wishes,

Thomas Valone, PhD, PE
